Q1. Which of the following devices is a trackball?

- (A) Touchpad
- (B) Output device
- (C) Input device**
- (D) Barcode reader

Solution: The correct answer is (c) Input device. A trackball is an input device that has a ball placed in a socket. The user rotates the ball to move the cursor on the screen. It works similarly to a mouse, but requires less desk space and can be more precise for certain tasks.

Q2. Who invented the first microprocessor?

- (A) Ted Hoff**
- (B) Vint Cerf
- (C) Terence Percival
- (D) John Mauchly

Solution: (a) Marcian Ted Hoff was one of the inventors who invented the first microprocessor. Other inventors are Federico Faggin, Masatoshi Shima, Stanley Major.

Q3. In MS-Word 2010, you can cut text from one area of a document and paste that text anywhere in that document. When you cut the text, it is stored on _____.

- (A) CELL
- (B) CLIPBOARD**
- (C) ROW
- (D) TABLE

Solution: (b) The clipboard stores text and graphics that you copy or cut from anywhere, and it provides you with the provision to paste the stored items into another file.

Q4. While we are studying the transmission speed of the computer, we may come to know about the term $\text{a} \diamond \diamond \text{MIPS} \text{a} \diamond \diamond$. What does M represent?

- (A) Million**
- (B) Miles
- (C) Micro
- (D) Macro

Solution: (a) Million instructions per second (MIPS) is an approximate measure of a computer's raw processing power.

Q5. A function inside another function is called a ____ function.

- (A) Nested**
- (B) Round
- (C) Sum
- (D) Text

Solution: The correct answer is option A. In programming and mathematics, when a function is used within another function as part of an argument or operation, it is known as a 'nested' function. This allows for combining multiple functions to perform more complex and intricate calculations or operations.

Q6. What is the corresponding hexadecimal and octal equivalent representation of the binary number 1011111011110010?

- (A) BF790 and 576744
- (B) BAF02 and 263772
- (C) 17EF2 and 277362**
- (D) 97FB0 and 447675

Solution: Converting the binary number 1011111011110010 into its hexadecimal and octal equivalents: Step 1: converting binary to hexadecimal. Binary number: 1011111011110010. Split the binary number into 4-bit groups from right to left (adding leading zeros if needed): 0001 0111 1110 1111 0010. Now, convert each group to

hexadecimal: 0001 $\rightarrow$ 1, 0111 $\rightarrow$ 7, 1110 $\rightarrow$ E, 1111 $\rightarrow$ F, 0010 $\rightarrow$ 2. So, the hexadecimal representation of 1011111011110010 is: 17EF2. Step 2: converting binary to octal. Binary number: 1011111011110010. Split the binary number into 3-bit groups from right to left (adding leading zeros if needed): 010 111 111 011 110 010. Now, convert each group to octal: 010 $\rightarrow$ 2, 111 $\rightarrow$ 7, 111 $\rightarrow$ 7, 011 $\rightarrow$ 3, 110 $\rightarrow$ 6, 010 $\rightarrow$ 2. So, the octal representation of 1011111011110010 is: 277362. Final answer: Hexadecimal: 17EF2; Octal: 277362. So, the correct answer is: (c) 17EF2 and 277362.

Q7. Which of the following keyboard shortcuts is used to display and hide the desktop in Windows 10?

- (A) Windows logo key + D**
- (B) Windows logo key + H
- (C) Ctrl + H
- (D) Ctrl + D

Solution: The correct answer is option A. Windows logo key + D: this shortcut is used to minimize or restore all open windows and show the desktop. If you press it once, it minimizes all open windows, and if you press it again, it restores them to their previous state. Windows logo key + H: in Windows 10, this shortcut opens the Share charm. It lets you instantly share content like web pages, photos, or documents with other apps or contacts. Ctrl + H: this shortcut is not specific to Windows 10; it is a common keyboard shortcut used in many text editors and applications. In web browsers and some text editors, it typically opens the 'Find and Replace' dialog, letting you search and replace specific text within a document. Ctrl + D: again, this shortcut is not specific to Windows 10. In many text editors and applications, it can have different functions depending on the context. In some applications, it may be used to bookmark a page or document, but its exact function can vary from application to application.

Q8. If in a computer, 16 bits are used to specify address in a RAM, the number of addresses will be _____ bits

- (A) 65536**
- (B) 1028
- (C) 64K
- (D) 216

Solution: (a) A 16-bit integer can store 216 (or 65,536) distinct values. In an unsigned representation, these values are the integers between 0 and 65,535. Hence, a processor with 16-bit memory addresses can directly access 64 KB of byte-addressable memory.

Q9. How many numbers of rows and columns on a worksheet of MS-Excel 2010?

- (A) 1,048,576 rows by 16,384 columns
- (B) 65536 rows by 16,384 columns**
- (C) 65536 rows by 812 columns
- (D) 1,048,576 rows by 65536 columns

Solution: (b) Total number of rows and columns on a worksheet 1,048,576 rows by 16,384 columns.

Q10. Which of the following is an example of system software?

- (A) Adobe Photoshop
- (B) Windows operating system**
- (C) Google Chrome
- (D) Microsoft Word

Solution: The correct answer is (b). An example of system software is the Windows operating system. System software is designed to manage and control the computer's hardware components and provide a platform for running application software. The operating system handles tasks such as managing files, controlling peripheral devices, and facilitating user interaction with the computer. Adobe

Photoshop: this is application software used for image editing and graphic design, not system software. Google Chrome: this is a web browser, also considered application software, designed to access and navigate the internet. Microsoft Word: this is a word processing application used to create and edit documents, which classifies it as application software, not system software.

Q11. The first barcode system was developed by:

- (A) **Norman Joseph Woodland**
- (B) John McCarthy
- (C) John Barger
- (D) David Bradley

Solution: The correct answer is option A. The first barcode system was developed by Norman Joseph Woodland, along with Bernard Silver. They invented the barcode system in the late 1940s, and the first patent for the barcode system was issued to them in 1952. This technology later evolved into the barcodes we commonly use today for various purposes, including retail product labelling.

Q12. In paragraph formatting of MS-Word 2010, Ctrl + Q is used for which of the following purpose?

- (A) Open Apply Style task pane
- (B) **Remove paragraph formatting of highlighted paragraph.**
- (C) Change the paragraph spacing to double line
- (D) Remove paragraph indentation

Solution: (b) In Microsoft Word, Ctrl + Q removes all formatting from a highlighted paragraph.

Q13. All the deleted files go to _____ .

- (A) Task Bar
- (B) Toolbar
- (C) Computer
- (D) **Recycle Bin**

Solution: (d) The Recycle Bin acts as a 'holding bay' for deleted items, such as files and folders. Toolbar is a row of symbols on a computer screen that show the different things that the computer can do. The taskbar is the access point for programs displayed on the desktop, even if the program is minimized.

Q14. The format reduces an audio file to about one-tenth of its original size, while preserving much of the original quality of the sound.

- (A) DOC
- (B) PNG
- (C) GIF
- (D) **MP3**

Solution: (d) MP3 is a standard technology and format for compressing a sound sequence into a very small file (about one-tenth) while preserving the original level of sound quality when it is played. DOC → You can create, view, and edit Google documents, as well as Microsoft Word files, with the Google Docs app for Android. PNG → (Portable Network Graphic), It's a particularly popular file type with web designers because it can handle graphics with transparent or semi-transparent backgrounds. GIF → (Graphics interchange format), it is used as a means of reducing the size of images and short animations.

Q15. What will be the result of the following MS Excel formula? =FACT(5-4)

- (A) 120
- (B) 24
- (C) 96
- (D) **1**

Solution: (d) =FACT(5-4) = 1. The Excel fact function returns the factorial of the given number. It can be used as a worksheet function in Excel.

Q16. Electronic mail belongs to which of the following services on the internet?

- (A) World wide web
- (B) **Communication service**
- (C) Information retrieval services
- (D) Web services

Solution: (b) Electronic mail (e-mail) is an efficient communication tool, it allows Internet users to send and receive messages from around the world. An IR system is a software system that provides access to books, journals and other documents; stores and manages those documents. Web search engines are the most visible IR applications. A Web service is a method of communication between two electronic devices over a network.

Q17. What type of storage device is a hard disk?

- (A) Off-line storage
- (B) Tertiary storage
- (C) Primary storage
- (D) **Secondary storage**

Solution: A hard disk is a secondary storage device. Here's why: Primary storage is memory the CPU can directly access, like RAM (Random Access Memory), which is temporary and fast. Secondary storage devices are used to store data for a long time, such as hard disks, SSDs, optical discs, and USB drives. These devices store data permanently, even when power is off. Off-line storage is storage not directly connected to the system, such as external drives or tapes. Tertiary storage is storage where data is stored in a way that requires manual intervention to retrieve it (like tape drives). So, the correct answer is: (d) Secondary storage.

Q18. The _____ formula is MS-Excel 2010 has the primary function of summing numbers in specific cells.

- (A) COUNT
- (B) AVERAGE
- (C) **SUM**
- (D) IF

Solution: (c) SUM → This function returns the sum of a supplied list of numbers. AVERAGE → This function returns the Average of a list of given numbers. COUNT → This function Returns the number of numerical values in a supplied set of cells or values. IF → This function allows logical comparisons between a value and what is expected.

Q19. In MS-Excel 2010, _____ is used to give a graphical representation of any set of data.

- (A) Rows
- (B) Table
- (C) **Chart**
- (D) Columns

Solution: The correct answer is option C. In MS-Excel 2010, a chart is used to give a graphical representation of any set of data. Charts can display data in various formats, such as bar charts, line charts, pie charts and much more, making it easier to visualize and analyse data.

Q20. Which of the following is used to identify every computer on the internet?

- (A) Computer name
- (B) Internet address
- (C) Location address
- (D) **IP address**

Solution: (d) An IP address, or Internet Protocol address, is a series of numbers that identifies any device on a network. An IP address is a string of numbers separated by periods. IP addresses are expressed as a set of four numbers, e.g., 192.158.1.38. Each number in the set can range from 0 to 255.

Q21. Which of the following keyboard shortcuts is used to switch to the last tab of the Chrome browser?

- (A) ALT + 9
- (B) CTRL + L

- (C) CTRL + 9
(D) CTRL + 0

Solution: (c) CTRL + 9 shortcuts are used to switch to the last tab of the Chrome browser. Alt-F9 shortcut brings up the Windows search panel instead of toggling the field code. Ctrl + L Aligns the line or selected text to the left of the screen. Ctrl + 0 changes the zoom level back to its default setting.

Q22. Which of the following mouse clicks can be used to select a paragraph in MS Word?

- (A) Single right click
(B) Double Left Click
(C) Single Left Click
(D) Triple Left Click

Solution: (d) Triple Left Click mouse clicks can be used to select a paragraph in MS Word. Right Click shows a list of commands in the monitor. Left click lets us select an icon on the monitor and gives command to the computer. Double clicking is used to perform a variety of actions, such as opening a program, opening a folder, or selecting a word of text.

Q23. Which of the following shortcut key is used to paste the clipboard contents in an MS Word document?

- (A) Ctrl+V
(B) Ctrl+X
(C) Ctrl+C
(D) Ctrl+Z

Solution: (a) Ctrl+V is used to paste the clipboard contents in an MS Word document. Ctrl+X is a shortcut key most often used to cut any selected text, image, or other objects. Ctrl+C is used to copy text and images. Ctrl + Z is used to reverse the last Action.

Q24. A(n)_____ is a register or main memory location which contains the effective address of the operand.

- (A) Pointer
(B) Pendrive
(C) Special location
(D) Floppy

Solution: (a) The register or memory location that contains the effective address of the operand is a pointer. When an execution takes place in such mode, instruction may be told to go to a specific address. Once it's there, instead of finding an operand, it finds an address where the operand is located.

Q25. Viruses, trojan horses and worms are_____

- (A) able to harm computer system
(B) unable to detect if present on computer
(C) user-friendly applications
(D) harmless applications resident on computer

Solution: (a) Some computer viruses are programmed to harm your computer by damaging programs, deleting files, or reformatting the hard drive for e.g. worms, trojan horse etc.
