

## Theft and compensation: On news publishers and AI models

Large language artificial intelligence models are fuelled by content on the Internet, and much of this content comprises news reports gathered, curated and published by media professionals and organisations with decades of experience. As creative industries reckon with their labour getting diffused into unaccountable clusters of graphics processing units that reproduce styles and spit out human-level artwork in mere seconds, the news industry has reason to fear the compounding of permission-less innovation into an existentially threatening heist of several lifetimes of work. Previous waves of digitisation peeled away captive audiences from print and broadcast media by replacing these with a web-charged attention economy, and Big Tech platforms further squeezed news media's place in these rapid transformations by often short-changing the very sources of information that their businesses relied on to be useful to the public. In a landscape where even precarious business models in the Internet age are threatened by a reluctance to pay for news and declining public trust in professional news-gathering, AI may very well be a body blow. It is clear: AI firms, with their billions in market capitalisation, must not be permitted to just take what they want from the Internet, synthesise these inputs into monetised insights, and pretend that the whole process is a form of victimless, innovative progress. Publishers have a clear right to decide who gets to Hoover up their entire corpuses, and to ensure that their businesses benefit from the AI wave. To this end, the Department for Promotion of Industry and Internal Trade's committee on copyright and AI is a welcome step.

This is not a decelerationist, or "decel" demand, as those who advocate for rapid AI development might be quick to say. The news industry has fought as search giants and social media companies profited enormously on the back of its content and set the terms for how the financial benefits flowed back to it. That cannot be permitted to happen — as social media platforms turn more and more into video-focused walled gardens, discouraging even a step outside their apps. For the news organisations, the avenues to earn are shrinking. As AI-generated overviews of news content with source links are reduced to a footnote, it is time for compensation to be negotiated at the time of publishers' content being scraped from their websites in the first place. AI firms may claim "fair use" in model training, but there is nothing fair — morally or legally — about accessing and disseminating troves of news without taking the creators and processors into confidence. News publishers and policymakers must now fight for their share in the AI era.

[Practice Exercise]

- Red/blue coloring of words in the sentence indicates subject verb relationship; where 'red' denotes 'subject' and 'blue' denotes 'verb'.

## Vocabulary

1. **Theft** (noun) – robbery, stealing, burglary, larceny, misappropriation चोरी
2. **Compensation** (noun) – payment, reimbursement, reparation, redress, restitution मुआवज़ा
3. **Large language model** (noun) – a type of artificial intelligence (AI) program designed to understand and generate human language.
4. **Fuel** (verb) – power, drive, energize, sustain, stimulate प्रेरित करना
5. **Curated** (adjective) – organized, selected, assembled, edited, arranged व्यवस्थित
6. **Decade** (noun) – Period of ten years, दशक
7. **Reckon** (with) (verb) – confront, deal with, handle, face, acknowledge सामना करना
8. **Diffuse** (verb) – scatter, disperse, spread, distribute, dissipate फैलाना
9. **Unaccountable** (adjective) – unanswerable, unchecked, unrestricted, unregulated, irresponsible बिना जवाबदेही के
10. **Cluster** (noun) – group, bunch, collection, assembly, aggregate समूह
11. **Graphics processing units** (GPU) (noun) – a specialized electronic circuit designed to rapidly manipulate and alter memory to accelerate the creation of images, videos, and other visual content
12. **Spit out** (phrasal verb) – emit, eject, release, throw out, generate बाहर निकालना
13. **Mere** (adjective) – simple, only, just, nothing more than, trivial मात्र
14. **Compounding** (noun) – intensification, worsening, accumulation, escalation, multiplication बढ़ोतरी
15. **Existentially** (adverb) – fundamentally, vitally, essentially, crucially, in a life-affecting way अस्तित्वगत रूप से
16. **Heist** (noun) – theft, robbery, burglary, looting, plunder डकैती
17. **Wave** (noun) – surge, trend, phase, movement, flow लहर
18. **Digitisation** (noun) – digital conversion, computerization, automation, data processing डिजिटलीकरण
19. **Peel away** (phrasal verb) – remove, separate, strip, detach, pull away अलग करना
20. **Captive** (adjective) – confined, restricted, trapped, immobile, bound बंधा हुआ

21. **Web-charged** (adjective) – internet-driven, online-based, digitally influenced वेब-आधारित
22. **Attention economy** (noun) – It refers to the marketing and branding strategies companies use to capture your attention in an effort to maintain profitability.
23. **Squeeze** (verb) – restrict, pressure, compress, reduce, suppress दबाव डालना
24. **Often** (adverb) – frequently, regularly, usually, repeatedly, commonly अक्सर
25. **Short-charge** (verb) – underpay, deprive, cheat, deduct unfairly, give less कम भुगतान करना
26. **Rely** (on) (verb) – depend on, trust, count on, be supported by निर्भर होना
27. **Landscape** (noun) – setting, scenario, context, situation, domain परिदृश्य
28. **Precarious** (adjective) – unstable, uncertain, insecure, risky, unreliable अस्थिर
29. **Reluctance** (noun) – unwillingness, hesitation, disinclination, resistance, avoidance अनिच्छा
30. **A body blow** (noun) – serious setback, major damage, shock, harmful impact करारा झटका
31. **Market capitalisation** (noun) – the value of a company that is traded on the stock market, calculated by multiplying the total number of shares by the present share price.
32. **Synthesise** (verb) – combine, merge, integrate, generate, assemble समाहित करना
33. **Monetised** (adjective) – commercialized, revenue-generating, profitable, paid मौद्रिकृत
34. **Insight** (noun) – understanding, perception, knowledge, realization, awareness अंतर्दृष्टि
35. **Pretend** (verb) – fake, act, feign, simulate, make believe दिखावा करना
36. **Victimless** (adjective) – harmless, non-injurious, without victim, unhurtful बिना पीड़ित वाला
37. **Hoover up** (phrasal verb) – collect, gather, suck in, absorb, scoop up चूसना / पूरी तरह से लेना
38. **Corpus** (noun) – collection, archive, body, database, repository संग्रह
39. **To this end** (phrase) – for this purpose, accordingly, with this goal इस उद्देश्य से
40. **Decelerationist** (adjective) – anti-rapid growth, slow-tech advocate, cautionary धीमी गति समर्थक

41. **Decel** (adjective) – short for decelerationist, slow-AI stance, techno-skeptical धीमी प्रगति का
42. **Advocate** (verb) – support, recommend, back, promote, argue for समर्थन करना
43. **Enormously** (adverb) – greatly, hugely, massively, immensely, significantly अत्यधिक
44. **On the back of** (phrase) – as a result of, following, due to, relying on के चलते
45. **Term** (noun) – condition, clause, provision, agreement, stipulation शर्त
46. **Flow back** (phrasal verb) – return, revert, come back, recirculate वापस लौटना
47. **Walled garden** (noun) – a restricted range of information to which subscribers to a particular service are limited. सीमित पारिस्थितिकी तंत्र
48. **Avenue** (noun) – path, opportunity, channel, option, route मार्ग / अवसर
49. **Footnote** (noun) – minor detail, side note, reference, annotation, addendum फुटनोट
50. **Negotiate** (verb) – discuss, bargain, mediate, settle, arrange बातचीत करना
51. **Scrape** (verb) – extract, collect, harvest (data), copy, gather इकट्ठा करना (डेटा)
52. **Disseminate** (verb) – spread, circulate, publish, distribute, broadcast प्रचारित करना
53. **Trove** (noun) – collection, cache, store, hoard, repository खजाना
54. **Policymaker** (noun) – legislator, regulator, decision-maker, lawmaker, administrator नीति निर्माता
55. **Era** (noun) – period, age, epoch, time frame, generation युग

## Summary of the Editorial

1. **AI Relies on News Content** – Large language models are trained on vast internet content, including news articles produced by experienced media professionals.
2. **Creative Work at Risk** – Like other creative industries, journalism faces the threat of its work being replicated and monetized by AI without consent.
3. **Historical Disruption** – Earlier digital shifts eroded traditional media audiences, with Big Tech capturing user attention and sidelining original content creators.
4. **Big Tech Exploitation** – Tech platforms profited heavily from news content while often denying fair returns to the sources they depended on.
5. **AI Intensifies Threat** – The advent of AI may deal a severe blow to journalism's already fragile economic model.
6. **No Free Harvesting** – AI companies, despite their high valuations, must not be allowed to extract and monetize web content without permission.
7. **Publishers' Rights** – Media houses should have control over how and whether their content is used to train AI models.
8. **Government Intervention Welcomed** – The DPIIT committee on AI and copyright is a positive step toward addressing media concerns.
9. **Not Anti-AI Development** – The demand is not to slow AI progress, but to ensure fair and just participation of news creators in the AI economy.
10. **Past Exploitation by Search and Social Media** – The news industry was previously undercompensated while search engines and social platforms reaped major financial benefits.
11. **Shrinking Revenue Streams** – As social media becomes more enclosed and video-centric, earning opportunities for news outlets are shrinking.
12. **Neglected Attribution** – AI summaries now often reduce source links to minor footnotes, undermining the value of original journalism.
13. **Need for Pre-Scraping Compensation** – Publishers should be compensated when their content is scraped — not after AI-generated outputs appear.
14. **"Fair Use" Is Not Fair** – The editorial argues that AI firms invoking "fair use" for training lacks legal and ethical justification when creators are excluded.
15. **Call to Action** – Policymakers and publishers must assert their rights and demand equitable treatment in the evolving AI landscape.
