

AI videos, China's stealing the show

Chinese **companies** like ByteDance **are** pulling ahead of giants like Google in the race to generate video from text or pictures through AI. And their business is **booming overseas**. **Creating** an advertisement from a photograph or script **reduces** costs and entry barriers in video creation, which could affect the business model of the entertainment industry globally. Chinese tech companies have an initial advantage **in terms of** the data they can use to **train** their models on, but competition will **level the field** as the segment matures. We are nowhere close to producing an AI-generated version of Terminator yet; the models are, however, getting good enough to be used in the gaming industry.

AI-generated video is an **instance** of innovative technology **diffusion**. Amazon, Alphabet and **Microsoft-backed** OpenAI have been slow **off the block** after initially **demonstrating** its capabilities. Nifty Chinese companies are already **monetising** the segment as Silicon Valley **figures out** audiences and revenue. The Chinese have **dipped** into their video-heavy entertainment **ecosystem** and their large technology **workforce**, operating in a more competitive environment. China is **pushing the envelope** in automated manufacturing, and AI-generated design is finding its way into areas, such as the textile industry.

AI is now being taken over by **disruptors** rather than innovators. TikTok led the **disruption** in the social media **landscape**, and its **parent**, ByteDance, **is** building on its success by taking the **notion** of AI in film forward to AI as filmmaker. The process is **aided** by open-source technology development that **speeds up** innovation by letting it outside **proprietary walled gardens**. China is in a strong position relative to the US in AI, and **efforts** to restrict its access to high-end semiconductors **can** only **strengthen** its **resolve** to make its own chips. Customers don't care where AI-generated videos are being created, and the Chinese are **running away** with their **commercialization** much as they did with EVs and drones.

[Practice Exercise]

- Red/blue coloring of words in the sentence indicates subject verb relationship; where 'red' denotes 'subject' and 'blue' denotes 'verb'.

Vocabulary

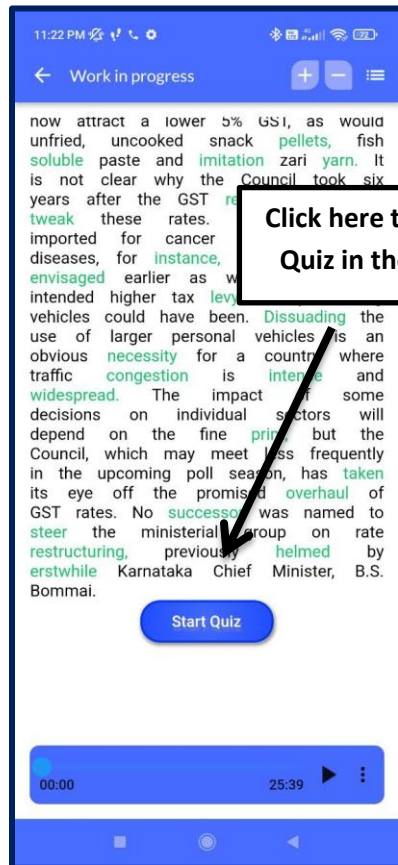

1. **Steal the show** (phrase) – attract attention, outshine, dominate, impress, overshadow
सबका ध्यान खींचना
2. **Boom** (verb) – thrive, flourish, prosper, surge, expand फलना-फूलना
3. **Overseas** (adjective) – international, foreign, global, external, offshore विदेशी
4. **In terms of** (phrase) – regarding, concerning, with respect to, in relation to, considering के संदर्भ में / की दृष्टि से
5. **Train** (verb) – teach, instruct, coach, educate, prepare प्रशिक्षित करना / सिखाना
6. **Level the field** (phrase) – equalize, balance, neutralize, even out, remove advantages
बराबरी करना / संतुलित करना
7. **Instance** (noun) – example, case, occurrence, illustration, situation उदाहरण
8. **Diffusion** (noun) – spread, dissemination, distribution, circulation, expansion प्रसार / फैलाव
9. **Microsoft-backed** (adjective) – supported, funded, sponsored, aided, endorsed (by Microsoft) माइक्रोसॉफ्ट द्वारा समर्थित
10. **Off the block** (phrase) – at the beginning, from the start, in the early stage, initial move, takeoff शुरुआत में / प्रारंभिक दौर में
11. **Demonstrate** (verb) – show, exhibit, display, prove, illustrate दिखाना / प्रदर्शित करना
12. **Monetise** (verb) – commercialize, generate revenue, capitalize, profit from, market राजस्व अर्जित करना / व्यावसायिक बनाना
13. **Figure out** (phrasal verb) – understand, solve, determine, decipher, decode समझना / हल करना
14. **Dip** (verb) – tap into, immerse, access, engage, utilize प्रवेश करना / हिस्सा लेना
15. **Ecosystem** (noun) – network, environment, system, setup, structure पारिस्थितिकी तंत्र / प्रणाली
16. **Workforce** (noun) – employees, staff, personnel, labor, human resources कर्मचारी / श्रमिक बल
17. **Push the envelope** (phrase) – innovate, experiment, expand limits, challenge boundaries, break norms सीमाओं को आगे बढ़ाना / प्रयोग करना
18. **Disruptor** (noun) – innovator, game-changer, radical thinker, transformer, change agent विघटनकारी / नया बदलाव लाने वाला

19. **Disruption** (noun) – disturbance, interruption, upheaval, innovation, transformation विघटन / बाधा
20. **Landscape** (noun) – scene, domain, environment, setting, field परिदृश्य
21. **Notion** (noun) – idea, concept, belief, understanding, opinion धारणा / विचार
22. **Aided** (adjective) – assisted, supported, helped, facilitated, backed सहायता प्राप्त / मदद की गई
23. **Speed up** (phrasal verb) – accelerate, hasten, quicken, fast-track, advance गति बढ़ाना
24. **Proprietary** (adjective) – private, exclusive, owned, trademarked, patented निजी
25. **Walled garden** (noun) – a restricted range of information to which subscribers to a particular service are limited. बंद प्रणाली / सीमित नेटवर्क
26. **Strengthen** (verb) – reinforce, fortify, boost, enhance, solidify मजबूत करना
27. **Resolve** (noun) – determination, willpower, firmness, decisiveness, intent दृढ़ संकल्प
28. **Run away** (phrasal verb) – lead, move ahead, get far ahead, surge ahead, dominate आगे निकल जाना / तेजी से बढ़ना
29. **Commercialisation** (noun) – monetization, business development, marketing, profit-making, trading व्यावसायीकरण

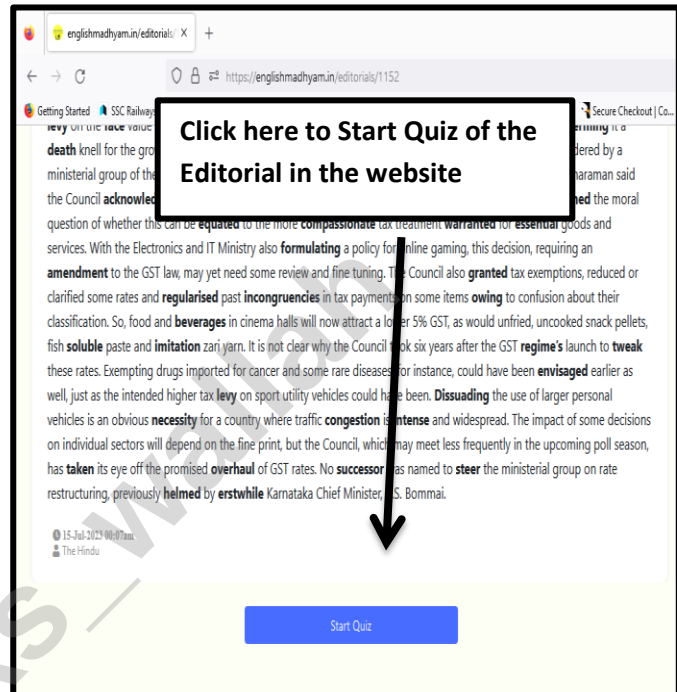

Summary of the Editorial

1. Chinese companies like ByteDance are outperforming Western tech giants like Google in AI-generated video development.
2. They are successfully creating videos from text or images, making content production cheaper and more accessible.
3. This innovation could disrupt the global entertainment industry by altering traditional production models.
4. China enjoys an early lead due to access to vast training data and its video-centric digital ecosystem.
5. As the AI video segment matures, competition is expected to equalize, with global players catching up.
6. Although we are far from sci-fi-level AI, current models are already useful in gaming and visual storytelling.
7. AI video tech exemplifies rapid diffusion of innovation, with China quickly monetizing the opportunity.
8. Western firms like Amazon, Alphabet, and OpenAI have been slower to commercialize AI video despite early breakthroughs.
9. China's competitive tech environment and workforce help speed up development and deployment.
10. The country is also applying AI video tech in fields like automated manufacturing and textile design.
11. The current wave of progress is being led by disruptors (like TikTok) rather than traditional innovators.
12. ByteDance is evolving from social media disruption to pioneering AI-driven filmmaking.
13. Open-source development is helping accelerate global innovation by removing proprietary barriers.
14. The US-China AI rivalry is intensifying, especially as the US tries to restrict China's access to advanced semiconductors.
15. Ultimately, end-users are indifferent to the origin of AI-generated videos, and China is swiftly commercializing the technology, as it did with EVs and drones.
