

AI means business. let's put it to work

Earlier this week, Nirmala Sitharaman **stated** that **industries** that are most likely to **propel** India into becoming the world's third-largest economy **will** be those that **adopt** AI. All technologies **drive** economic growth through **productivity** improvement, greater value addition and **sustainable** development. AI can refine each of these **aspects** to make the process even easier. Of course, like all technologies, AI will have a **disruptive** impact on the job market, but this can be **lessened** through the **upskilling** of the workforce. AI should make growth more **equitable** by enhancing productivity across the value chain, lowering costs and reducing resource dependency.

This technology favours India particularly because its development **coincides with** a growth **spurt** for the economy, and the country has a large enough **pool** of technology workers to **speed up** AI **absorption**. The **pace** of AI **diffusion** **will** be decided by economic **momentum**, where India has been leading most large **economies** this **decade**. Its growth also **imposes** additional **constraints on sustainability**, where AI can make a big difference. Finally, the country's **demographics** require a **rapid transition** to better-paying jobs that AI can **facilitate**. India will be a significant player in the AI race, using technology to **overcome chronic** disadvantages in incomes, education and healthcare.

The nature of AI is more inclusive than digital technologies preceding it, which should **make for** a relatively **brisk** technological revolution. Technology is being taken out of the **grip** of a select section of society and transferred to the population **at large** to **employ** it whichever way they like. Entry **barriers**, such as familiarity with computer code, **slowed** the **dispersal** of digital technologies, but now any worker can use AI to make improved decisions. India also has a role in lowering the cost of AI solutions. **Data** generated on the large Indian population **should** help train AI models. Govt's **emphasis** on DPI can be expected to **keep** the local innovation **pot boiling**. **[Practice Exercise]**

- Red/blue coloring of words in the sentence indicates subject verb relationship; where 'red' denotes 'subject' and 'blue' denotes 'verb'.

Vocabulary

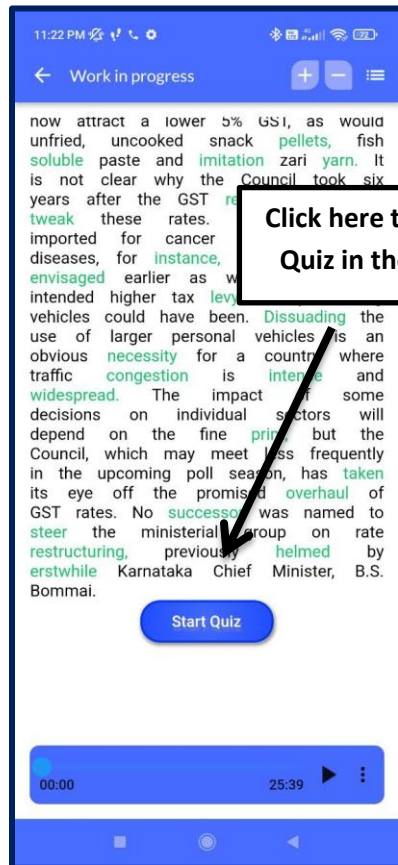

1. **State** (verb) – declare, announce, express, assert, mention कहना
2. **Propel** (verb) – drive, push, thrust, launch, accelerate प्रेरित करना / आगे बढ़ाना
3. **Adopt** (verb) – embrace, implement, accept, follow, take up अपनाना
4. **Drive** (verb) – power, stimulate, lead, steer, motivate प्रेरित करना
5. **Productivity** (noun) – efficiency, output, performance, yield, effectiveness उत्पादकता
6. **Sustainable** (adjective) – eco-friendly, renewable, viable, enduring, long-lasting टिकाऊ / स्थायी
7. **Aspect** (noun) – feature, facet, element, component, angle पहलू
8. **Disruptive** (adjective) – disturbing, unsettling, revolutionary, chaotic, disorganizing विघटनकारी
9. **Lessen** (verb) – reduce, diminish, decrease, ease, lower घटाना / कम करना
10. **Upskilling** (noun) – skill enhancement, training, learning, reskilling, education कौशल-वृद्धि
11. **Equitable** (adjective) – fair, just, impartial, unbiased, balanced न्यायसंगत / समान
12. **Coincide** (with) (verb) – occur simultaneously, match, overlap, synchronize, concur एक साथ होना
13. **Spurt** (noun) – surge, burst, rise, acceleration, boost तेजी / उछाल
14. **Pool** (noun) – group, collection, reservoir, fund, supply समूह
15. **Speed up** (phrasal verb) – accelerate, hasten, quicken, advance, fast-track तेज़ करना
16. **Absorption** (noun) – assimilation, intake, incorporation, adoption, reception आत्मसात
17. **Pace** (noun) – rate, speed, tempo, rhythm, momentum गति / चाल
18. **Diffusion** (noun) – spread, dissemination, distribution, circulation, transmission प्रसार
19. **Momentum** (noun) – force, energy, drive, push, impetus गति / प्रेरणा
20. **Economies** (noun) – Countries in terms of GDP अर्थव्यवस्थाएँ

21. **Decade** (noun) – Period of ten years,
दशक
22. **Impose** (verb) – enforce, apply, inflict,
dictate, command थोपना
23. **Constraint** (noun) – limitation,
restriction, restraint, curb, condition बाधा
/ सीमा
24. **Sustainability** (noun) – ecological
balance, endurance, environmental
health, renewability, viability स्थिरता
25. **Demographic** (noun) – population group,
section, age group, social segment,
census group जनसंख्या वर्ग
26. **Rapid** (adjective) – fast, quick, swift,
accelerated, prompt तीव्र / तेज़
27. **Transition** (noun) – change, shift, move,
transformation, passage परिवर्तन /
बदलाव
28. **Facilitate** (verb) – ease, assist, enable,
support, simplify सुविधा देना / सरल बनाना
29. **Overcome** (verb) – defeat, conquer,
prevail over, resolve, tackle पार पाना
30. **Chronic** (adjective) – persistent, long-
term, constant, ongoing, deep-rooted
पुराना / दीर्घकालिक
31. **Make for** (phrasal verb) – lead to,
contribute to, result in, produce, cause
कारण बनना
32. **Brisk** (adjective) – fast, lively, quick,
energetic, rapid तेज़ / फुर्तीला
33. **Grip** (noun) – control, hold, grasp,
command, clutch पकड़ / नियंत्रण
34. **At large** (phrase) – generally, in general,
widely, broadly, in the public domain
व्यापक रूप से
35. **Employ** (verb) – use, utilize, apply,
engage, operate उपयोग करना
36. **Barrier** (noun) – obstacle, hurdle, block,
hindrance, restriction बाधा
37. **Dispersal** (noun) – distribution,
scattering, spreading, diffusion,
deployment प्रसार / फैलाव
38. **Emphasis** (on) (noun) – focus, stress,
attention, importance, priority ज़ोर
39. **Keep something pot boiling** (phrase) –
maintain activity, keep progress alive,
sustain momentum, encourage
continuity, keep the spark alive लगातार
सक्रिय बनाए रखना

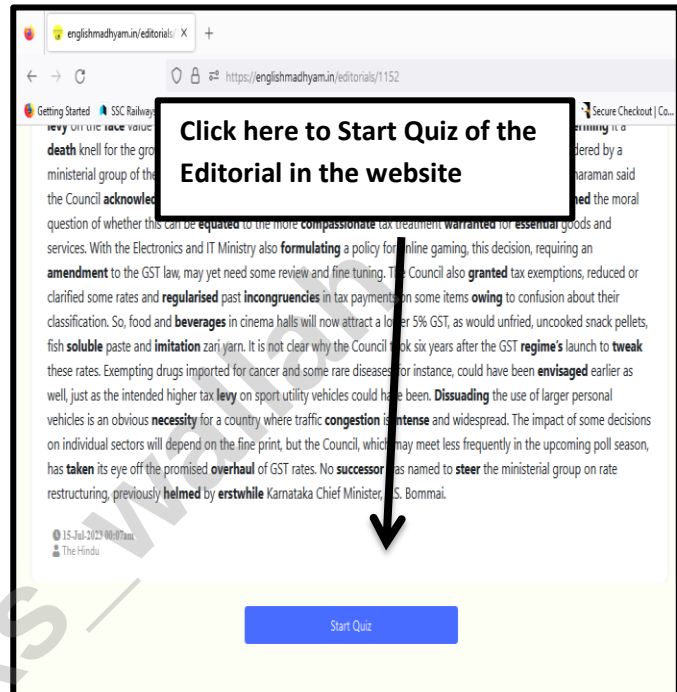

Summary of the Editorial

1. **AI Key to Economic Leap** – Finance Minister Nirmala Sitharaman stated that AI adoption will be crucial for India's rise as the world's third-largest economy.
2. **AI Enhances Productivity** – AI can significantly improve productivity, value addition, and sustainability, accelerating economic growth.
3. **Job Disruption and Upskilling** – Though AI may disrupt the job market, this can be mitigated through widespread upskilling.
4. **Equitable Growth Potential** – AI can help make growth more inclusive by boosting productivity, lowering costs, and reducing dependency on limited resources.
5. **India's Advantageous Timing** – India's rapid economic growth coincides with AI's global rise, offering an opportunity for swift adoption.
6. **Large Tech Workforce** – India's sizeable pool of tech professionals positions it well for quick AI integration.
7. **Economic Momentum as Catalyst** – India's sustained economic momentum will accelerate the spread of AI.
8. **Sustainability through AI** – With rising environmental constraints, AI can aid in achieving sustainable development.
9. **Demographic Imperative** – India's young population needs higher-paying jobs, which AI can help create and support.
10. **Closing Inequality Gaps** – AI could help bridge gaps in income, education, and healthcare access across the country.
11. **Inclusive Nature of AI** – Unlike earlier digital technologies, AI is inherently more inclusive and accessible.
12. **Reduced Entry Barriers** – AI tools no longer require coding knowledge, allowing broader usage across skill levels.
13. **Democratizing Technology** – AI moves beyond elite use to become a tool usable by the general population.
14. **India's Role in Affordable AI** – India can help make AI solutions more affordable, supporting global accessibility.
15. **Importance of DPI** – The government's focus on Digital Public Infrastructure (DPI) will drive local AI innovation.
