

Bringing trad med into the prescription

No more just 'Dadima ke nuskhe', India's traditional medicine has just taken a big step towards going global with GoI's agreement with WHO. **Inclusion** of 'trad med' in WHO's International Classification of Health Interventions (ICHI) **will** provide a **structured** approach to understanding and using these therapies globally. It opens the door to the **inclusion** of traditional Indian medicine as a **vital** component of modern healthcare.

Concerns about wellness and search for 'natural cures' **have** given traditional medicine a boost. Attention has also brought **infamy**, with many a 'snake-oil salesman' **cashing in**, especially since trad med was largely not **codified**, and because they were **often** made from extremely localised plant resources. In 2001, GoI **set up** the Traditional Knowledge Digital Library (TKDL) to **remedy** this situation and **safeguard** against **biopiracy**. The **aim** to systematically, and scientifically, convert and structure available knowledge on Indian systems of medicines such as ayurveda, siddha and unani **was** the first step to not see that **the baby was thrown out with the bathwater**. The next step is to ensure that genuinely **therapeutic** trad med systems are treated **at par with** modern medicine. Working with WHO makes this possible through standardisation, making it possible to **integrate** trad med into broader healthcare framework, ensuring it is recognised and utilised effectively.

Replicating genetic resources to develop mass-market meds **creates** economic opportunities for communities as **keepers** of **genetic** resources and knowledge. An **agreement** last year under the UN Convention on Biological **Diversity** **makes** this possible. The agreement with WHO adds another **dimension** to the economic opportunity through global **standardisation** and **adoption**. **[Practice Ex.]**

- Red/blue coloring of words in the sentence indicates subject verb relationship; where 'red' denotes 'subject' and 'blue' denotes 'verb'.

Vocabulary

1. **Trad med** (noun) – healthcare practices that originated from cultural beliefs and knowledge, rather than modern scientific principles पारंपरिक चिकित्सा
2. **Structured** (adjective) – organized, systematic, methodical, orderly, arranged संरचित
3. **Inclusion** (noun) – incorporation, addition, integration, involvement, admittance समावेश
4. **Vital** (adjective) – essential, crucial, necessary, important, indispensable अत्यावश्यक
5. **Infamy** (adjective) – notoriety, disgrace, shame, dishonor, scandal बदनामी
6. **Snake-oil salesman** (noun) – a person who deceives or misleads others, often by selling worthless or fraudulent goods or services झूठे इलाज बेचने वाला धोखेबाज़
7. **Cash in** (phrasal verb) – take advantage, exploit, profit from, benefit, monetize लाभ उठाना
8. **Codify** (verb) – systematize, arrange, classify, organize, formalize व्यवस्थित रूप देना / कानूनन दर्ज करना
9. **Often** (adverb) – frequently, regularly, repeatedly, many times, commonly अक्सर
10. **Set up** (phrasal verb) – establish, initiate, found, start, launch स्थापित करना
11. **Remedy** (verb) – fix, resolve, correct, cure, redress सुधार करना
12. **Safeguard** (verb) – protect, defend, shield, secure, preserve रक्षा करना
13. **Biopiracy** (noun) – the practice of commercial exploitation of biochemicals or genetic materials which occur naturally जैव चोरी
14. **The baby was thrown out with the bathwater** (phrase) – discard something valuable along with the unwanted, overcorrect, misjudge, lose the good while rejecting the bad अच्छे के साथ बुरे को भी फेंक देना
15. **Therapeutic** (adjective) – healing, medicinal, curative, remedial, restorative चिकित्सकीय
16. **At par with** (phrase) – equal to, on the same level, equivalent, comparable, similar बराबरी पर
17. **Integrate** (verb) – merge, combine, incorporate, unify, assimilate एकीकृत करना
18. **Replicate** (verb) – duplicate, reproduce, copy, recreate, clone दोहराना

19. **Keeper** (noun) – guardian, custodian, protector, preserver, holder संरक्षक
20. **Genetic** (adjective) – hereditary, inherited, DNA-related, biological, genomic आनुवंशिक
21. **Diversity** (noun) – variety, range, multiplicity, assortment, heterogeneity विविधता
22. **Dimension** (noun) – aspect, element, component, factor, feature पहलू
23. **Standardisation** (noun) – uniformity, normalization, regulation, consistency, systematisation मानकीकरण
24. **Adoption** (noun) – acceptance, implementation, embracing, incorporation, approval अपनाना

Summary of the Editorial

1. India's traditional medicine is gaining global recognition through a recent agreement with the World Health Organization (WHO).
2. Traditional medicine (trad med) is no longer seen merely as "Dadima ke nuskhe" (grandmother's remedies).
3. WHO's International Classification of Health Interventions (ICHI) now includes traditional medicine, offering a structured global framework.
4. This inclusion could help integrate Indian traditional systems like Ayurveda, Siddha, and Unani into modern healthcare.
5. The global trend towards natural cures and wellness has revived interest in traditional medicine.
6. However, this rise in popularity has also attracted fraudulent practitioners due to a lack of codification.
7. In 2001, the Government of India launched the Traditional Knowledge Digital Library (TKDL) to document and protect traditional knowledge.
8. TKDL aims to scientifically structure Indian medicinal knowledge and prevent biopiracy.
9. This initiative ensures that valuable traditional knowledge is preserved, not discarded blindly.
10. The next goal is to treat proven traditional therapies on par with modern medicine.
11. Collaboration with WHO facilitates standardisation and validation of these therapies.
12. This makes it possible to embed traditional medicine in the mainstream healthcare system globally.
13. Communities that conserve genetic resources and traditional knowledge stand to benefit economically.
14. A UN Convention on Biological Diversity agreement (2023) enables these communities to earn from mass-market medicines developed from local resources.
15. The WHO partnership adds a new economic and scientific dimension to India's traditional medicine through global acceptance and use.
