

Going Concern

According to accounting principles, a **company** with an **indefinitely** long life **is** called a 'going concern'. Our planet earth has similarly **existed** for a very long time and is expected to exist long into the future. **Ironically**, the planet has had a past of extreme, **uninhabitable** temperatures, which was not a threat to its **existence**.

However, the **existence** of humans on earth **depends** on a long- term continuation of a narrow range of temperatures, air quality and purity of water. In **cosmic** terms, we are **fragile** creatures who will **perish** if ideal conditions within these narrow ranges do not continue.

Reckless consumption growth combined with **rapid** population increase **is** the root cause of threat to a **habitable** environment on earth. Technological solutions may solve the issues **in the long run**, but the **discovery** of cost-effective technologies that solve all problems and control side effects of solutions **would** remain uncertain.

THE SPEAKING TREE

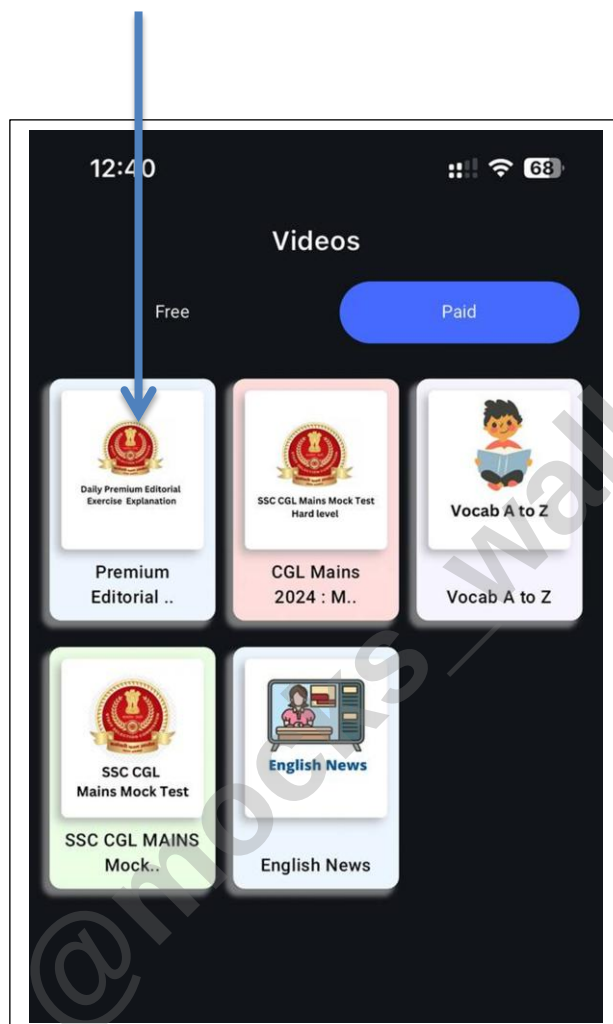

Ultimately, it **boils down** to whether we consider the living conditions of future generations to be our responsibility. That, in turn, depends on how aware we are of the **interconnectedness** of entire existence. Kabir said chaaron disi jagiri mein - the whole universe was his personal property. His **compassion encompassed** everything as a going concern. Similarly, **a path** of **mindful** and controlled consumption **can** convert this planet's living conditions into a going concern. **[Practice Exercise]**

- Red/blue coloring of words in the sentence indicates subject verb relationship; where 'red' denotes 'subject' and 'blue' denotes 'verb'.

Vocabulary

1. **Going concern** (noun) – a business that is financially stable and is expected to continue operating indefinitely.
2. **Indefinitely** (adverb) – endlessly, perpetually, infinitely, unceasingly, without limit अनिश्चित काल तक
3. **Exist** (verb) – live, survive, remain, be present, endure अस्तित्व में होना
4. **Ironically** (adverb) – paradoxically, unexpectedly, sarcastically, oddly, contrary to expectation विडंबनापूर्ण ढंग से
5. **Uninhabitable** (adjective) – unlivable, hostile, unfit, barren, unsuitable for life रहने योग्य नहीं
6. **Existence** (noun) – life, survival, being, presence, reality अस्तित्व
7. **Cosmic** (adjective) – universal, celestial, astronomical, galactic, vast ब्रह्मांडीय
8. **Fragile** (adjective) – delicate, weak, brittle, vulnerable, breakable नाज़ुक
9. **Perish** (verb) – die, collapse, vanish, decay, cease नष्ट होना
10. **Reckless** (adverb) – carelessly, rashly, irresponsibly, heedlessly, thoughtlessly लापरवाही से
11. **Rapid** (adjective) – fast, swift, quick, speedy, accelerated तीव्र
12. **Habitable** (adjective) – livable, fit for living, suitable, inhabitable, occupiable रहने योग्य
13. **In the long run** (phrase) – eventually, ultimately, over time, in the end, in future दीर्घकाल में
14. **Boil down** (phrasal verb) – reduce to, simplify, amount to, come down to, summarize मुख्य बात होना
15. **Interconnectedness** (noun) – interrelation, interdependence, link, cohesion, unity आपसी संबंध
16. **Compassion** (noun) – empathy, kindness, mercy, sympathy, benevolence करुणा
17. **Encompass** (verb) – include, cover, surround, embrace, contain समाहित करना
18. **Mindful** (adjective) – aware, conscious, attentive, careful, thoughtful सजग / जागरूक

Summary of the Editorial

1. Accounting Analogy: The term 'going concern', used in accounting for entities with indefinite life, is applied metaphorically to planet Earth.
2. Planet's Longevity: Earth has existed for billions of years and is expected to persist, regardless of environmental conditions.
3. Not the Planet, But Humans at Risk: The planet can survive extreme temperatures, but human life depends on narrow climate, air, and water conditions.
4. Human Fragility: In cosmic terms, humans are fragile beings, whose survival depends on maintaining ideal environmental conditions.
5. Key Threat – Overconsumption: The main threat to Earth's habitability is reckless consumption and rapid population growth.
6. Environmental Degradation: These human actions are disturbing the ecological balance essential for sustaining life.
7. Technology's Uncertain Promise: While technology offers hope, its ability to provide cost-effective, holistic, and side-effect-free solutions remains uncertain.
8. Long-Term View Needed: Ensuring a livable planet hinges on whether we feel responsible for future generations.
9. Ethical Foundation: The editorial stresses the need for moral and ethical awareness, rooted in our sense of interconnectedness.
10. Kabir's Philosophy: Poet-saint Kabir is quoted to emphasize a universal sense of belonging and compassion — seeing the universe as one's own.
11. Interconnectedness of Life: Recognizing the interconnected nature of all existence is key to taking meaningful environmental action.
12. Compassionate Living: Kabir's worldview reflects a life of compassion, restraint, and responsibility toward all living things.
13. Path of Mindfulness: A lifestyle based on mindful and controlled consumption is presented as the solution to environmental threats.
14. Redefining Prosperity: True sustainability comes not from limitless growth, but from awareness-driven, thoughtful living.
15. Planet as a Going Concern: With conscious effort, Earth can remain a habitable 'going concern' — not just for the planet itself, but for human life on it.
