

Synergise regional and national science academies

It is essential for regional science academies to actively promote science through regional media and provide regular updates

Science education in the country **is at a cross-roads**, because of the declining trend among the new generation to **pursue** a career in Science. Across the country, many brilliant students move towards professional courses that fetch them a good placement soon after their studies. No one will wait 5 or 10 years to get a good placement. Even our **policymakers** neglect basic science education, forgetting the fact that it's the backbone for building a strong Viksit Bharat. The **trend** of student **exodus** to foreign countries **is** increasing. The public's initial **encounter** with scientific advancements **often occurs** through newspapers, television programs, and various other **media outlets**. The **reduction** in space or airtime allocated to Science **can** be viewed as a direct challenge to the field. Many media organisations prioritise commercial **considerations** when making decisions about content allocation. They may contribute to a lack of public awareness and understanding of scientific concepts, potentially **hindering** progress in scientific literacy and societal engagement with Science.

This lack of awareness **leads to** parental pressure on students to move away from science courses. It is where our regional science academies in the country can play a lead role in building a **robust** scientific force for the future. We have three national science academies in India -the Indian National Science Academy, the Indian Academy of Sciences, and the National Academy of Sciences, India. Even though our National Science Academies are doing their service to promote Science, it doesn't reach **every nook and corner** of the country. Here, regional science academies come into the picture.

Regional science academies can play a crucial role in **fostering** scientific advancement, education, and **collaboration** within specific geographic regions. These academies are **well-positioned** to **address** and prioritize issues that are specific to a particular region. They can focus on problems related to geography, climate, **biodiversity**, and other factors that may vary from one region to another. By bringing together scientists and researchers from a specific region, science academies help build a strong and collaborative scientific community. This **facilitates** the exchange of ideas, expertise, and resources, **fostering** a culture of innovation and cooperation.

It is essential for regional science academies to actively promote Science through regional language media channels, maintain regular interactions with journalists, and offer science updates. Apart from science popularisation activities, many regional academies conduct studies on various topics that could affect the **enhancement** of Science in society, for example, student exodus to foreign countries, public **perception** of science and scientific research, etc. Regional academies can offer **insights** into the unique challenges faced by their communities and contribute to developing informed policies that address regional needs.

Regional science academies can promote **diversity** and inclusion in Science by supporting underrepresented groups within the region. This contributes to a more inclusive and **equitable**

scientific community. Regional science academies' **contributions** to nation-building and developing scientific **temper are** well documented in history. In our journey towards a Viksit Bharat, we should take various regional science academies and the National Science Academies' by **affiliating** them to the National body. When both academies work with a common goal, it can foster significant advancements in Indian Science. By **aligning** their efforts and resources, these academies can synergise their strengths, expertise, and networks to tackle scientific challenges more effectively.

- Red/blue coloring of words in the sentence indicates subject verb relationship; where 'red' denotes 'subject' and 'blue' denotes 'verb'.

Vocabulary

1. **Synergize** (verb) – Collaborate, unite, integrate, coact, amalgamate सहयोग करना
2. **At a cross-roads** (phrase) – At a critical or decisive point संकट के मोड़ पर
3. **Pursue** (verb) – Follow, chase, seek, strive for, aim for खोजना
4. **Policymaker** (noun) – Decision-maker, legislator, official, executive नीति निर्माता
5. **Exodus** (noun) – Departure, emigration, mass departure, withdrawal पलायन
6. **Encounter** (noun) – Meeting, confrontation, सामना
7. **Often** (adverb) – Frequently, commonly, regularly, habitually अक्सर
8. **Media outlet** (noun) – News platform
9. **Consideration** (noun) – Thought, deliberation, contemplation, reflection विचार
10. **Hinder** (verb) – Obstruct, impede, inhibit, block, hamper बाधा डालना
11. **Lead** (to) (verb) – Result in, cause, bring about, contribute to, provoke का कारण बनना
12. **Robust** (adjective) – Strong, sturdy, resilient, durable, tough मजबूत
13. **Every nook and corner** (phrase) – Every part, everywhere, all over, in every place हर कोने में
14. **Foster** (verb) – Promote, encourage, nurture, cultivate, develop प्रोत्साहित करना
15. **Collaboration** (noun) – Partnership, cooperation, alliance, teamwork सहयोग
16. **Well-positioned** (adjective) – Advantageously located, favorably situated, well-placed अच्छी स्थिति में
17. **Address** (verb) – Tackle, deal with, attend to, confront, approach सुलझाना, निपटाना
18. **Biodiversity** (noun) – Variety of life, ecological diversity, biological diversity जैव विविधता
19. **Facilitate** (verb) – Make easier, assist, aid, help, simplify सुगम बनाना
20. **Enhancement** (noun) – Improvement, augmentation, increase, boost सुधार
21. **Perception** (noun) – Understanding, awareness, conception, insight धारणा
22. **Insight** (noun) – Understanding, realization, discernment, comprehension अंतर्दृष्टि
23. **Diversity** (noun) – Variety, multiplicity, heterogeneity, range विविधता
24. **Equitable** (adjective) – Fair, just, impartial, unbiased, balanced न्यायसंगत
25. **Scientific temper** (noun) – a modest open-minded temper—a temper ever ready to

welcome new light, new knowledge, new experiments, even when their results are unfavourable to preconceived opinions and long-cherished theories.

26. **Affiliate** (to) (verb) – Associate with, join, link, connect संबद्ध करना

27. **Align** (verb) – Line up, arrange, coordinate, position संरेखित करना

Summary of the Editorial

1. **Promotion of Science through Regional Media:** Regional science academies need to actively engage in promoting science via regional media channels and provide regular updates to the public.
2. **Science Education at a Crossroads:** The country faces a decline in interest among the new generation to pursue science careers, with many opting for professional courses for quicker job placements.
3. **Neglect of Basic Science Education:** Policymakers have been neglecting basic science education, which is crucial for building a strong foundation for a developed nation, referred to as "Viksit Bharat".
4. **Increasing Student Exodus:** There's a growing trend of students moving abroad for higher education, which is a concern for the domestic scientific community.
5. **Media's Role in Scientific Awareness:** The reduction in media coverage of science topics directly impacts public awareness and understanding of scientific advancements.
6. **Parental Pressure:** Lack of awareness about the value of science education leads to parental pressure on students to pursue non-science courses.
7. **Role of National Science Academies:** India has three national science academies which promote science, but their reach is limited across the country.
8. **Importance of Regional Science Academies:** These academies play a vital role in fostering scientific advancement and education within specific geographic regions, addressing regional issues.
9. **Focus on Regional Issues:** Regional academies prioritize problems specific to their area, such as geography, climate, and biodiversity, promoting a localized approach to science.
10. **Collaboration and Community Building:** By uniting regional scientists and researchers, these academies foster a collaborative community that encourages the exchange of ideas and resources.
11. **Active Engagement with Media:** Essential for regional academies to maintain communication with journalists and offer science updates, promoting science in regional languages.
12. **Research on Societal Impact of Science:** Regional academies conduct studies on topics like student exodus and public perception of science, contributing to informed policy development.
13. **Promotion of Diversity and Inclusion:** Supporting underrepresented groups within the region, regional academies contribute to a more inclusive scientific community.
14. **Contribution to Nation-Building:** The role of regional science academies in developing scientific temper and contributing to nation-building is historically significant.
15. **Synergizing Efforts with National Bodies:** Aligning the goals and resources of regional and national science academies can lead to greater advancements in Indian science, fostering a unified approach to tackle scientific challenges.
