

Go forth and multiply (income)

The **initial wage gap** for workers **migrating** out of India, **estimated** by the World Bank at over 100% on average, **makes** it a one-way street. The **subsequent** growth opportunities are also relatively higher, especially for **migrants** who can make the **transition** from low-skilled employment to high-skilled employment in their **host** country. The **scope** for such transition **is** greater in advanced **economies**, with a broader range of **immigration** requirements. This **influences** the **reverse flow** of migrants, which is higher in West Asia than in **OECD countries**. However, the principal **determinant** in a migrant's return **remains** the **wage differential**, which is not closing as fast for low-skilled jobs as it is for those involving higher degrees of skill.

For an economy that is the world's biggest recipient of **remittances**, the policy objective would be to improve the skills of a larger proportion of its workforce. This **accomplishes** the dual objective of domestic industry being able to **absorb** some of these skills while those exported are also less likely to be **stranded** abroad due to **wage arbitration**. The broader objective would be **accelerating** low-skill income growth **at home** through high-skilled manufacturing and services. The second-order **effects** on intermediate and low-skilled employment **can** be impressive.

The **pace** of India's economic growth **has** to be **sustained** at high levels to match the gains made by its migrant workers. A worker staying back will need over two **decades** of economic growth to match the income gains made by a colleague who migrates. This gap can only be closed by targeting GDP growth rates in the region of 10%. The developing **economies** that have sustained such growth rates **have** all been export-led. That model may no longer be workable **given** the manufacturing capacities that China has built, but India can experience a growth **spurt** with services **thrown in**. Even as more people leaving our **shores** does make for a quicker, wider spread of the 'Indian way' of **dealing with** the world.

[Practice Exercise]

- Red/blue coloring of words in the sentence indicates subject verb relationship; where 'red' denotes 'subject' and 'blue' denotes 'verb'.

Vocabulary

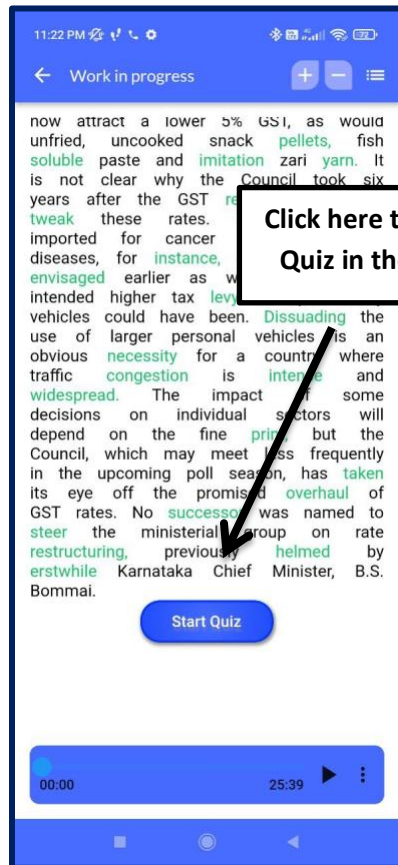

1. **Go forth** (phrasal verb) – go away from a place रवाना होना
2. **Migrate** (verb) – Relocate, move, emigrate, resettle, shift बस जाना/ प्रवास करना
3. **Estimate** (verb) – Calculate, approximate, assess, evaluate, gauge अनुमान लगाना
4. **Subsequent** (adjective) – Following, later, ensuing, successive, next बाद का
5. **Migrant** (noun) – Immigrant, expatriate, traveler, mover, foreign worker प्रवासी
6. **Transition** (noun) – Change, shift, passage, transformation, move परिवर्तन
7. **Host** (adjective) – Receiving, welcoming, accommodating, sheltering, entertaining मेज़बान
8. **Scope** (noun) – Range, extent, breadth, span, possibility गुंजाइश
9. **Economies** (noun) – Countries in terms of GDP अर्थव्यवस्थाएँ
10. **Immigration** (noun) – the process of coming to live permanently in a country that is not your own; the number of people who do this परदेश में बसना/ आप्रवासन
11. **Influence** (verb) – Affect, sway, shape, impact, guide प्रभाव डालना
12. **Reverse flow** (noun) – Back to one's own country
13. **OECD countries** (noun) – Member countries of the Organization for Economic Co-operation and Development, which are primarily advanced economies
14. **Determinant** (noun) – Factor, cause, reason, influence, decider निर्धारक
15. **Wage Differential** (noun) – Pay gap, salary difference, income disparity, wage gap वेतन अंतर
16. **Remittance** (noun) – the sending of money to a recipient who lives abroad धन प्रेषण
17. **Accomplish** (verb) – Achieve, complete, fulfill, execute, carry out पूरा करना
18. **Absorb** (verb) – to take something into something larger, so that it becomes part of it अपने में समा लेना; अंतर्लीन करना
19. **Stranded** (adjective) – Stuck, marooned, isolated, abandoned, helpless फंसा हुआ
20. **Wage arbitration** (noun) – The process of resolving wage disputes between employers and employees वेतन मध्यस्थता

21. **Accelerate** (verb) – Speed up, quicken, hasten, increase, advance तेज करना
22. **At home** (phrase) – Domestically, in one's own country, locally, within the nation अपने देश में
23. **Pace** (noun) – Speed, rate, tempo, velocity, momentum गति
24. **Sustain** (verb) – Maintain, uphold, continue, keep up, support बनाए रखना
25. **Decade** (noun) – period of ten years दशक
26. **Given** (preposition) – Considering, in view of, taking into account, due to, because of को देखते हुए
27. **Spurt** (noun) – Surge, burst, increase, acceleration, rapid rise उछाल
28. **Throw in** (phrasal verb) – Include, add, contribute, toss in, insert जोड़ना
29. **Shore** (noun) – Coast, bank, coastline, land, seashore तट
30. **Deal with** (phrasal verb) – Manage, handle, cope with, address, tackle सामना करना

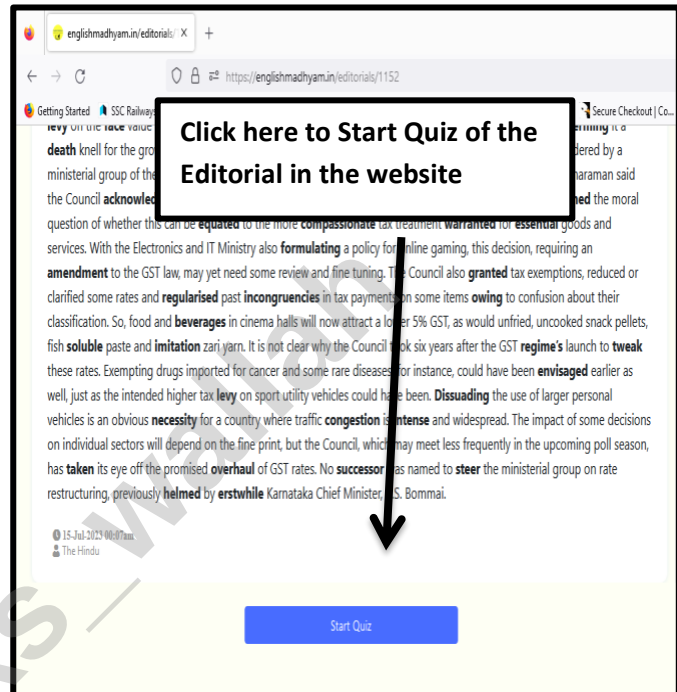

Summary of the Editorial

1. The wage gap for Indian migrant workers is significant, with the World Bank estimating over 100% on average, making migration appealing.
2. Migrants have better growth opportunities, especially when transitioning from low-skilled to high-skilled employment in their host countries.
3. Advanced economies offer broader immigration requirements, enhancing opportunities for upward mobility for migrants.
4. Migrants in OECD countries tend to return less frequently compared to those in West Asia due to differences in wage growth and opportunities.
5. The wage differential remains a key factor in migrant return rates, with slower closure for low-skilled jobs compared to high-skilled jobs.
6. India is the world's largest recipient of remittances, making it crucial for policy to focus on improving workforce skills.
7. Enhancing workforce skills benefits both domestic industries and migrants, reducing the chances of being stranded abroad due to wage arbitration.
8. Accelerating low-skill income growth domestically through high-skilled manufacturing and services is essential.
9. Growth in high-skilled sectors can have significant positive effects on intermediate and low-skilled employment.
10. India's economic growth must be sustained at high levels to match the income gains of its migrant workers.
11. A worker staying in India may need over two decades of growth to match the income gains of a colleague who migrates.
12. Closing the income gap requires targeting GDP growth rates of around 10%.
13. Developing economies that achieved sustained high growth have relied on export-led models, which may no longer be feasible for India due to China's manufacturing dominance.
14. India's growth spurt could come from a combination of manufacturing and services, despite global challenges.
15. Increased migration helps spread the 'Indian way' of engaging with the world, contributing to global influence.
