

'FOURTH LARGEST'

It has happened a bit earlier than the general **prediction**! Since every Indian was eyeing that **elevation**, India's **rise** to become the world's fourth largest economy -- as **asserted** by NITI Aayog **quoting** the authentic data from the International Monetary Fund (IMF) -- **has** not come as a surprise to anybody. No matter that, it is, therefore, time for India to **pat its own back** to have achieved the 4-trillion-dollar mark to **surpass** Japan in global economic ranking.

Now, the next step is to overtake Germany to become the world's third largest economy -- which is being predicted to happen in the next three years. **Going by** available indicators, that mark, too, would be touched and crossed -- to indicate the **galloping** strength of the Indian economic **mechanics** and **dynamics**.

Of course, there will be some who would challenge the claim that India has become the world's fourth largest economy. They will raise issues **without much substance** to **highlight** the socio-political **limitations** of the country. And **one** of the issues raised by these **doubting Thomases** **would** be that the Government is still feeding around 80 crore people on a daily basis since the COVID-19 period. However, those doubting minds and the subject of economy would ask, **in essence**, what has that got to do with the country's economic **pro prowess** that has allowed it to provide for **essentials** to 80 crore people on a daily basis for years? Thus, the doubters get a direct **rebuttal** from the greatest economic logic.

The IMF has suggested, in essence, that India continues to remain the world's fastest growing economy in the world. The IMF has also predicted that India would **register** a 6% growth annually in the next five years. That would be enough to take its Gross Domestic Product (GDP) to 5,584.476 billion dollars by 2028. That would be more than enough for India to overtake Germany (the third largest economy now) and close the gap with China as well as the United States in the first spot.

This is, of course, a very happy thought, a proud thought, a satisfying thought for every Indian -- no matter political **differences**, no matter whether some people like Mr. Narendra Modi as Prime Minister or not. For, the issue is not about who, who is the Prime Minister. The issue is how he leads the country in this critical **domain**. It is not without reason, therefore, that the Confederation of All Indian Traders (CAIT) has **hailed** Mr. Modi's "**visionary governance**".

This is certainly the point to attract not just the national but also the global attention -- Mr. Modi's **proactive** leadership. **Let alone** the economic **jargon** to talk about the Indian economic rise, it is necessary to understand the spiritual **thrust** he gave to the country's economic thought-process. "Dream big and achieve big," he had said, **in effect**, as he took over the national leadership eleven years ago. He also said, Sabka Saath, Sabka Vikas, Sabka Vishwas ('Support of all, development of all, trust of all') -- thus taking the developmental **discourse** to an **endearing** level of collective national **consciousness**.

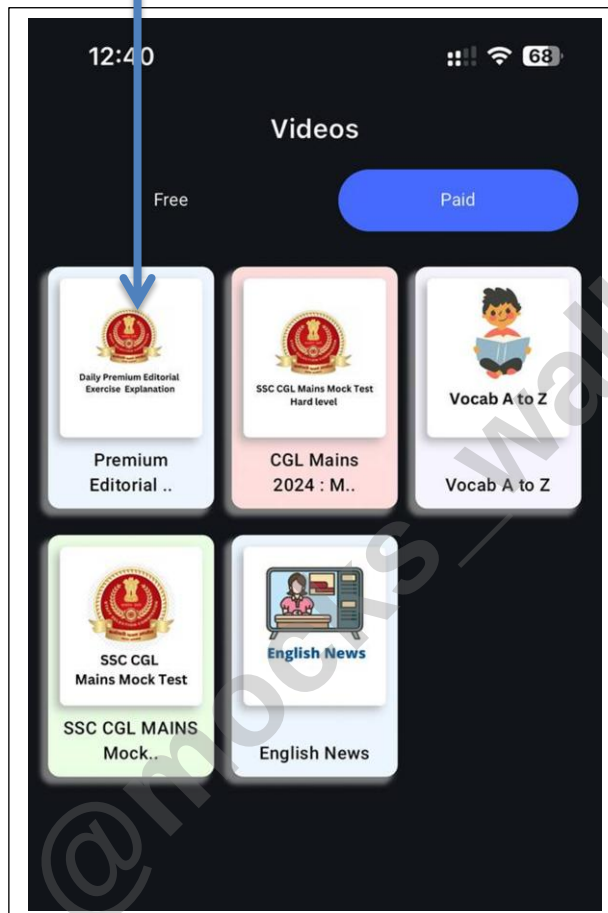

Yet, the **poet** in the Prime Minister's mind **did** not **overpower** the practical economic **wisdom**. Every move, every step, every plan, every scheme was totally inclusive and **non-elite** political. This **democratisation** of the economic effort and approach **became** the key to India's growth. There is no need to highlight every scheme the Modi Government **floated** or carried forward with focus to its political outcome. **Suffice** it to say, therefore, that when a **nation** as spiritually charged as India **launches** a journey on a powerful economic mission -- in any domain. That is going to be the power of India's **trajectory** on the economic path. [Practice Exercise]

Vocabulary

1. **Prediction** (noun) – forecast, projection, prophecy, prognosis, estimation भविष्यवाणी
2. **Elevation** (noun) – rise, promotion, upgrade, advancement, growth उन्नति
3. **Assert** (verb) – declare, affirm, claim, state, maintain दावा करना

Summary of the Editorial

1. **India Becomes 4th Largest Economy** – India has officially surpassed Japan to become the world's fourth largest economy, as per IMF data cited by NITI Aayog.
2. **Ahead of Predictions** – This achievement came earlier than most experts had forecasted.
3. **Next Goal: Third Position** – India is now expected to overtake Germany in the next three years to become the third largest economy.
4. **Consistent Growth** – The IMF projects India's economy will grow at 6% annually over the next five years.
5. **Future GDP Estimate** – India's GDP is estimated to reach \$5.58 trillion by 2028, closing the gap with China and the U.S.
6. **Criticism Dismissed** – Some critics argue India can't be economically strong while feeding 80 crore people daily, but the editorial sees this as proof of economic capability.
7. **Rebuttal to Critics** – Providing for such a massive population is seen as a strength, not a weakness, of India's economic framework.
8. **Global Recognition** – India is acknowledged globally as the world's fastest growing major economy.
9. **Unified National Pride** – The economic rise is seen as a point of pride for all Indians, regardless of political preference.
10. **Modi's Leadership Praised** – PM Narendra Modi's leadership and vision are credited for enabling this economic leap.
11. **Visionary Governance** – Bodies like the Confederation of All Indian Traders (CAIT) have praised Modi's approach to economic management.
12. **Spiritual-Economic Integration** – Modi's leadership is said to combine spiritual inspiration with practical economic planning.
13. **Inclusive Development** – Schemes and plans under Modi's government are described as inclusive, democratic, and non-elitist.
14. **Developmental Philosophy** – Modi's mantra *Sabka Saath, Sabka Vikas, Sabka Vishwas* is highlighted as the driving force behind economic unity.
15. **India's Economic Trajectory** – The editorial concludes with confidence in India's continued rise as a global economic power driven by collective spirit and focused governance.
