

Will AI take your job?

When **Sam Altman**, the CEO of OpenAI, **warned** in 2023 that AI could 'cause significant harm to the world', it wasn't just **lawmakers** who took notice. Students, engineers and fresh graduates flooded Google with searches like 'Will AI take over my job?' and 'Is coding still relevant?'

Meditation sessions at IITs, B-schools and startup hubs **garner** interest as tools for clarity and balance in a **tech-saturated** world, and as Gen Z wishes to develop what AI lacks: **intuition**.

Steve Jobs once said, 'Intuition is more powerful than **intellect**.' **Intuition**, **sharpened** through **stillness**, **can** give us **the cutting edge**. Meditation is becoming our career **armour**. IT giants enable employees to work with AI, but some leaders recommend a parallel shift, teaching employees to stay focused and centred. Inner balance might be tomorrow's main skill.

THE SPEAKING TREE

AI may **automate** tasks, but it can't automate you. Each of us is a unique, carefully designed program of nature, whose **innate potential** and abilities extend far beyond the capabilities of **mere** machines. The real revolution? Discovering true human potential.

In the movie 'Her', a man falls in love with an AI voice. It is an **indication** of where we are **heading**. We must pause and choose how to **equip** ourselves in the AI era.

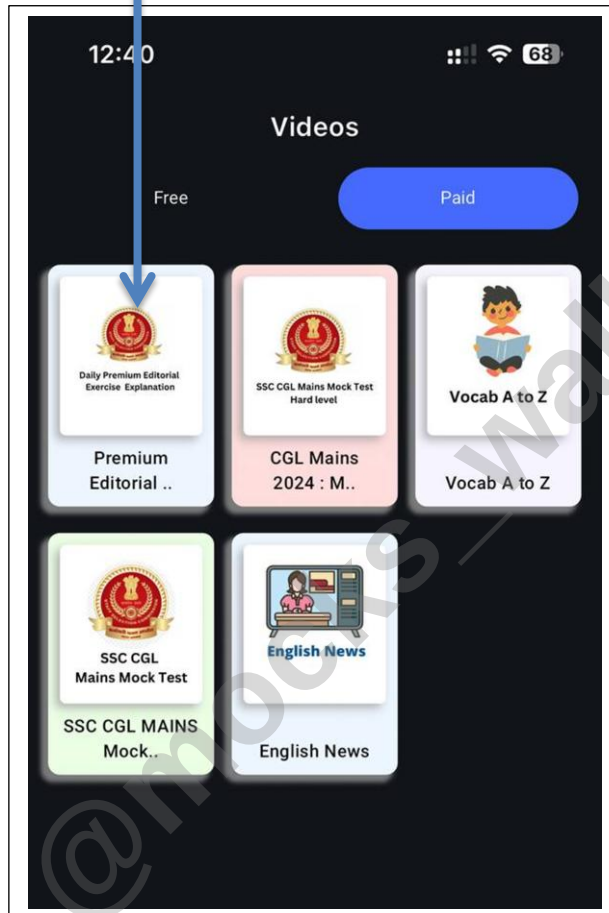

[Practice Exercise]

- Red/blue coloring of words in the sentence indicates subject verb relationship; where 'red' denotes 'subject' and 'blue' denotes 'verb'.

Vocabulary

1. **Lawmaker** (noun) – legislator, policymaker, parliamentarian, MP, congressperson
कानून निर्माता
2. **Meditation** (noun) – contemplation, mindfulness, reflection, concentration, stillness ध्यान
3. **Garner** (verb) – gather, collect, accumulate, attract, acquire इकट्ठा करना / प्राप्त करना
4. **Tech-saturated** (adjective) – technology-heavy, digitally dominated, tech-filled, gadget-loaded, tech-immersed तकनीक से भरा हुआ
5. **Intuition** (noun) – instinct, gut feeling, insight, sixth sense, perception अंतर्ज्ञान
6. **Intellect** (noun) – intelligence, brainpower, reasoning, understanding, mental capacity बुद्धिमत्ता
7. **Sharpen** (verb) – improve, hone, enhance, strengthen, refine तेज करना / सुधारना

Summary of the Editorial

1. The rise of AI has sparked widespread concern about job security, especially among students, engineers, and recent graduates.
2. Google searches like "Will AI take over my job?" and "Is coding still relevant?" have surged in response to these concerns.
3. OpenAI CEO Sam Altman's 2023 warning about AI's potential harm contributed to public anxiety around the issue.
4. In tech and academic hubs like IITs, B-schools, and startups, meditation sessions are gaining popularity as a coping tool.
5. These practices aim to help people develop intuition, a key human ability that AI lacks.
6. The editorial echoes Steve Jobs' quote: "Intuition is more powerful than intellect," highlighting its relevance in the AI age.
7. Meditation is being positioned as "career armour", equipping people to remain mentally balanced and focused amid automation.
8. While companies are adapting to AI by enabling collaboration, some leaders emphasize inner stability as equally important.
9. The future workforce may value inner balance and mindfulness as essential professional skills.
10. AI can perform many tasks, but it cannot replicate human uniqueness, emotions, or intuitive decision-making.
11. Humans are described as "unique, carefully designed programs of nature" with immense untapped potential.
12. The editorial argues that the real revolution is not in AI advancement but in humans realizing their inner capabilities.
13. The film 'Her', where a man falls in love with an AI, is referenced to highlight how deeply AI is entering human lives.
14. This fictional scenario serves as a warning and reflection of the direction society might be heading.
15. Ultimately, the piece urges readers to pause and choose wisely how to grow in the AI era — not just technically, but spiritually and intuitively.
