

Tackling climate change with green mobility

Climate change is no longer knocking on our doors — it's inside our homes. From Delhi's **smogchoked** air to Mumbai's **unpredictable** monsoons and the **scorching** heatwaves **sweeping** across the country, the evidence is all around us. The only question that remains is: how quickly can we respond? **One** of the most immediate and impactful ways to **address** this crisis **lies in** how we travel.

Transport contributes nearly 23 per cent of global carbon emissions. In India, road transport alone **accounts for** over 12 per cent of energy-related CO2 emissions, a number that is growing rapidly with increasing urbanisation and rising vehicle ownership. India's mobility story needs a **decisive** shift toward **sustainability**.

Electric vehicles (EVs), **efficient** public transport, walking, cycling, and shared mobility **cannot** remain **niche** solutions — they must become the **new normal**.

This isn't just a strategy to lower emissions; it's a vision for cleaner air, healthier communities, and more liveable cities. Currently, our roads are dominated by petrol and diesel — powered vehicles. The **consequences** are all too familiar: **deteriorating** air quality, rising carbon levels, and **escalating** public health risks. **A report** by the Energy and Resources Institute (TERI) **warns** that if we do not act, transport emissions in India could increase **six-fold** in the coming **decades**. These issues are more than **abstract** concerns — they **pose tangible** risks to the daily lives and **well-being** of millions."

There is cause for **optimism**. India's electric vehicle **transition** is gathering **momentum**. The Government has set clear and **ambitious** goals: by 2030, 30 per cent of new cars and 80 per cent of two and three-wheelers sold should be electric. Encouragingly, in Q1 of 2025, EV sales grew by more than 50 per cent compared to the previous year — an unmistakable sign that public acceptance of clean mobility is **gaining ground**. However, the real gamechanger lies not just in private electric vehicles, but in electrifying public transport — especially buses. These are the lifelines of our cities, connecting millions every day across socio-economic lines. An electric bus does far more than reduce **tailpipe emissions**.

It eases noise pollution, lowers urban **congestion**, and replaces dozens of individual vehicles on the road. **Brands** like NueGo, GreenCell Mobility's electric intercity bus service, **are** already **demonstrating** how clean, comfortable, and safe electric transport can become a mainstream reality in India. **Addressing** climate change **is** not the **sole** responsibility of Governments or large corporations — it requires collective effort. Industry must lead with innovation, **policymakers** must create the right **incentives**, and citizens must **embrace sustainable** choices. Together, we must rethink how we move. Sustainable mobility is about more than clean fuel. It's about building a fairer, healthier, and more liveable India — for ourselves and for future generations. The path is clear. The technology **exists**. The time to act is now.

Vocabulary

1. **Green mobility** (noun) – a range of transportation methods that prioritize sustainability, energy efficiency, and minimal environmental impact
2. **Smogchoked** (adjective) – polluted, smoke-filled, hazy, suffocating, murky धुएं से भरा हुआ
3. **Unpredictable** (adjective) – uncertain, erratic, variable, inconsistent, unreliable अनिश्चित
4. **Scorching** (adjective) – blazing, burning, searing, sweltering, intense झुलसाने वाला
5. **Sweep** (verb) – move swiftly, surge, spread, rush, advance फैलना
6. **Address** (verb) – tackle, handle, confront, respond to, deal with समाधान करना
7. **Lie** (in) (verb) – consist in, reside in, be based in, depend on, exist in निहित होना
8. **Account for** (phrasal verb) – constitute, represent, make up, explain, contribute जिम्मेदार होना
9. **Decisive** (adjective) – conclusive, crucial, definite, resolute, critical निर्णायक
10. **Sustainability** (noun) – eco-friendliness, viability, renewability, green development, environmental balance सततता
11. **Efficient** (adjective) – effective, productive, economical, streamlined, well-organized कुशल
12. **Niche** (noun) – specialized area, segment, corner, subset, category सीमित या विशिष्ट क्षेत्र
13. **New normal** (noun) – a previously unfamiliar or atypical situation that has become standard, usual, or expected. नया सामान्य
14. **Consequence** (noun) – result, outcome, effect, impact, aftermath परिणाम
15. **Deteriorate** (verb) – worsen, decline, degrade, weaken, degenerate बिगड़ना
16. **Escalate** (verb) – intensify, increase, heighten, aggravate, amplify बढ़ना / तेज होना
17. **Six-fold** (adjective) – six times, multiplied by six, increased six times, sixfold, hexagonal growth छह गुना
18. **Decade** (noun) – Period of ten years दशक
19. **Abstract** (adjective) – theoretical, conceptual, intangible, notional, speculative अमूर्त
20. **Pose** (verb) – present, cause, create, constitute, bring उत्पन्न करना

21. **Tangible** (adjective) – concrete, real, physical, visible, actual मूर्त / वास्तविक
22. **Well-being** (noun) – health, welfare, prosperity, safety, comfort कुशलता / भलाई
23. **Optimism** (noun) – hopefulness, positivity, confidence, enthusiasm, assurance आशावाद
24. **Transition** (noun) – change, shift, transformation, evolution, conversion परिवर्तन
25. **Momentum** (noun) – drive, energy, thrust, impetus, push गति / प्रगति
26. **Ambitious** (adjective) – aspirational, determined, bold, visionary, goal-oriented महत्त्वाकांक्षी
27. **Gain ground** (phrase) – advance, progress, make headway, succeed, spread प्रगति करना
28. **Tailpipe emission** (noun) – exhaust fumes, vehicular emission, gas discharge, pollutant release, carbon output – वाहन निकास उत्सर्जन
29. **Congestion** (noun) – overcrowding, blockage, traffic jam, jam, obstruction भीड़ / जाम
30. **Demonstrate** (verb) – show, exhibit, prove, illustrate, display प्रदर्शित करना
31. **Sole** (adjective) – only, single, exclusive, solitary, unique अकेला
32. **Policymaker** (noun) – legislator, regulator, lawmaker, decision-maker, authority नीति निर्धारक
33. **Incentive** (noun) – motivation, encouragement, stimulus, benefit, inducement प्रोत्साहन
34. **Embrace** (verb) – adopt, accept, welcome, support, espouse अपनाना
35. **Sustainable** (adjective) – eco-friendly, viable, green, renewable, long-lasting टिकाऊ
36. **Exist** (verb) – be, live, occur, subsist, survive मौजूद होना

Summary of the Editorial

1. Climate change is a present crisis, affecting daily life in India through smog, erratic monsoons, and heatwaves.
2. Transport contributes significantly to global warming, with 23% of global carbon emissions coming from this sector.
3. India's road transport accounts for over 12% of energy-related CO₂ emissions, driven by rapid urbanisation and vehicle growth.
4. Sustainable mobility must move from being niche to mainstream, including EVs, public transport, cycling, walking, and shared rides.
5. Current dependence on petrol and diesel vehicles is worsening air quality, carbon emissions, and public health risks.
6. A TERI report warns that India's transport emissions could grow six-fold without urgent intervention.
7. Green mobility is not just about emissions — it also promotes cleaner air, healthier communities, and more liveable cities.
8. There is positive momentum in India's EV adoption, especially in early 2025, with EV sales up by over 50% year-on-year.
9. Government goals are ambitious, targeting 30% electric cars and 80% electric two- and three-wheelers by 2030.
10. Electrifying public transport, particularly buses, is seen as a more impactful shift than focusing only on private EVs.
11. Electric buses reduce more than just emissions — they also lower noise, reduce traffic, and replace multiple vehicles.
12. Companies like NueGo are proving that clean and comfortable electric intercity transport is viable and effective.
13. Tackling climate change requires collective action — not just from governments and industries, but from citizens as well.
14. Policymakers must create incentives, industries should innovate, and people must choose sustainable transport options.
15. The tools and technologies exist — what's needed now is urgent, coordinated action to shift toward sustainable mobility.
